

How to Use the Colab Notebook

1. Open the notebook using the Colab link:

<https://colab.research.google.com/github/catarinaroman/css001/blob/main/lectures/L02-tools.ipynb>

(Short link: <https://tinyurl.com/y3b9x6sr>)

2. In the Colab toolbar, go to:

File -> Save a copy in Drive

3. A new tab will open with a copy named something like:

'Copy of L02-tools.ipynb'

4. This copy is now saved in your Google Drive, under a folder called 'Colab Notebooks' by default.

You can move or rename it however you want.

5. From there, you can:

- Edit the notebook
- Run cells
- Add notes
- It autosaves as you go!
